

Next Steps

It is important to note that an assessment in and of itself is not a scope of work. It is a tool to assist the District in determining an overall magnitude of renovation and repairs, providing indexes to prioritize needs. Identifying every specialized circumstance was beyond the scope of this project. It will ultimately be determined by Boise Independent School District whether an addition, major renovation, or replacement is necessary at a school building for a number of reasons including, but not limited, to the following:

- An existing space within a school may be able to be retrofitted to meet the space requirements of the current educational specifications.
- Site size constraints may limit opportunities for any new construction or additions.
- Available funding

DeJONG-RICHTER is pleased to have had the opportunity to provide Boise Independent School District with this Educational Adequacy Assessment Executive Summary. We hope this document will provide the necessary information to make informed decisions about the future of the Boise Independent School District.

*** An appendix with assessors score sheets and marked-up floor plans from the Educational Adequacy Assessments will be made available upon request.
